

Name three consequences of Java erasure.

What does Java generic method type inference do?

When might it fail?

What's the difference between generics and templates?

Create an `ArrayList` that can hold any type.

(Java)

What's the difference between `List<?>`,
`List<Object>`, and raw `List`?

(Java)

Describe Java wildcard capture.

When should Java generic methods be preferred over wildcard non-generic methods?

Give the Java type variance bounds syntax.

What are some holes in Java generics?

Describe Java gotcha with generic `varargs`.
