

What do specs and ScalaTest support?

Enable/disable `assert()` and `ensuring()`.

List the two forms of `assert()`.

Describe the test directory hierarchy.

How can you get more informative failure reporting than `assert()`?

Verify exception thrown, using `ScalaTest`.

Give a more Scala-esque way to use  
ScalaTest.

Compare specs and `org.scalatest.Spec`.

What does ScalaCheck support?

Concisely check the conditions of method's result.
