

Git tricks

Create a new branch on remote repo and track locally.

```
git push origin origin:refs/heads/iss20  
git checkout --track -b iss20 origin/iss20
```

Git tricks

Delete a remote branch.

```
git push origin :heads/branch_name
```

Git tricks

Delete a remote tag.

```
git push origin :tag_name
```

Git tricks

Revert last commit or two.

```
git revert HEAD #last only
```

```
git revert HEAD^ #last two
```

Now commit.

Git tricks

Revert a single working file to last in repo.

```
git checkout filename
```

Git tricks

Create a new branch with modified files in working copy.

```
git checkout -b newbranchname
```

Git tricks

Unstage files.

```
git reset HEAD path
```
