Guarantee your script will be run with Perl
5.10.

```
use 5.010;
```

Newer Perl versions allow what in place of
`print`?

How do you activate it?

```perl
say (adds a \n)

use feature qw(say);
```

Is whitespace significant in Perl?

No.

Statements end with ...

... a semicolon.

Run an external program and capture its output.

Write the program name surrounded with back ticks.
