M-! (`shell-command`)
Results go in *Shell Command Output*.

M-| (`shell-command-on-region`)
Results go in minibuffer.

C-u M-!
Results go in current buffer.

`shell`, or better yet, `ansi-term`.

Preface them with C-c.

C-x d (`dired`)

`emacs dir_name`

C-x C-f and select a directory

'd' to mark from deletion, 'u' to undelete, 'x' to carry out deletion.
'#' marks all auto-save files for deletion, '~' all backup files.
'D' deletes immediately.

'C', or 'NC' for some N for multiple files.

'R'

'Z'

```
auto-compress-mode
```

Set the mark on one, move the point to the other, then type
'='.
