```
git push origin origin:refs/heads/iss20
git checkout --track -b iss20 origin/iss20
```
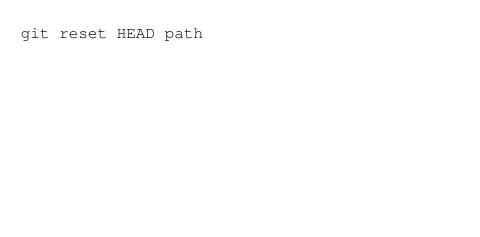

```
git push origin :heads/branch_name
```

```
git push origin :tag_name
```

```
git revert HEAD  #last only
git revert HEAD^ #last two
```
Now commit.

```
git checkout filename
```

```
git checkout -b newbranchname
```

```
git reset HEAD path
```

```
git co <hash> .
```

Forces a commit interpretation over a file path.
